

MCALPINE PARTY "ALIVE AND WELL"

Brief Flash Says Fliers Found at Cambridge Bay

Provincial Surplus Sets Record

Revenue Exceeds Expenditure By \$1,758,847.36

Profits From Liquor Stores Reach Nearly Three Millions—Auto Licenses Also Prove Profitable

For the year ending March 31, last, provincial finances reveal a surplus of \$1,817,871.28, according to the public account of the provincial treasurer for the year 1929, released on Monday by Hon. R. G. Reid, provincial treasurer and minister of municipal affairs.

The final result of provincial financing for the year is a surplus of \$1,758,847.36 in excess of the original estimate, which was \$859,023.92.

This is the second year in the history of the province and is the fourth in succession reported by the provincial treasurer.

Incidentally this is the first complete year's statement under the new system of provincial financing which changed the end of the fiscal year from December 31 to March 31.

It is expected that the next year's surplus will even greater, as with the disposition of the provincially owned powerplants, heavy interest charges will be removed and payments on the railways will be included.

LEFT CHARGES FOR BIG PROPORTION

It is a noteworthy feature that debt for the year ended March 31, 1929, totalled \$1,758,847.36, of which \$1,629,000 was in the form of public debt.

Incidentally this is the first

complete year's statement under the new system of provincial financing which changed the end of the fiscal year from December 31 to March 31.

It is expected that the next year's

surplus will even greater, as with the disposition of the provincially owned powerplants, heavy interest charges will be removed and payments on the

railways will be included.

HON. J. A. ROBB IS SERIOUSLY ILL IN EAST

Minister of Finance Suffering From Pneumonia—Has Even Chance

Canadian Press

TORONTO, Nov. 4.—The Hon. J. A. Robb, minister of finance, was resting easily Sunday night, having an easy time of it, though he had been stricken with pneumonia.

He was in the bronchial stage. There is hope it may pass without a crisis. The doctor is the sole source of concern.

The minister was indisposed on the train when he came from Ottawa ten days ago, but had been able to work up from cramps from messenger boy's spastic muscles.

The news came as the Wall Street boys usually go to restaurants.

In heavily affected business areas were restaurants closing day and night, catching up. They had also collected some crumbs, while customers were collecting large crumbs of experience.

NEXT YEAR'S BUILDING PLANS

Announcement that the Northern Alberta railway will extend westward from Hythe and from Fairview, on both sides of the Peace River, and may also build west from Spirit River and north from Grimshaw, will be welcome news to the people in that territory, as it is to the one whose wife is married to the development of the north country. Wellcome not only because the lines to be constructed will be of immense benefit to settlers, but also because under the hands of isolated men, however, this program gives early assurance that the transcontinental intend to proceed with railway construction on an extended scale in the Peace River area.

Under the terms of the purchase, the owners of the northern railway system are required to build a minimum of sixty miles of new line in five years besides completing the line which the Provincial Government then had in hand. Next year's program alone will be a literal fulfillment of these obligations. That they are to come in in a single season is the strongest evidence in the negotiations in the contract in no sense outline the amount of construction that will be done in this five year period. The inference is that the work will be completed to provide Peace River with railway facilities as rapidly as the circumstances warrant and to place a very liberal interpretation upon this condition.

THE CITY'S GOVERNMENT

It may be that the taxpayers of the city are now willing to pay salaries to the aldermen. They were not, when last consulted, in a sub-judice, and said by their votes in a sufficiently decisive fashion. That they have changed their minds is to be doubted.

The point of view was not elicited because the tax-payers were unrepresented. They never have been and are not. The amount of the allowances would be a small item in the annual expense bill of the city. Good aldermen could be cheap at the price. But would that type of alderman be attracted by the price?

There is no doubt that holding a place in the city council is a nuisance to a man who is not up to the task of meeting with council meetings and committee meetings, the demands upon the time of the aldermen are incessant. That is a position which a well-qualified man often finds himself in and fails to accept, with or without an indemnity.

But the loss and inconvenience which the aldermen suffer in this respect is very largely of their own making. It is not their duty, but their obligation, to represent the condition of the city. The condition has only been brought about because successive councils have deliberately and persistently set aside the plain intention of that constitution.

The city charter was framed in contemplation of an arrangement whereby the business of the city could be administered by a board of commissioners, possibly experts, with a council of elected aldermen meeting a couple of evenings in the month to lay down the general lines along which the commissioners should work.

How far we have departed from that plan is apparent enough. There is one appointed commissioner, in addition to the elected mayor. The commissioners are, however, not the commissioners who are meeting by day and by night to handle business which they do not need to handle, while the charter did not intend them to handle, and which it specifically provided that they should not.

This diversion did not come about by accident. It was dictated by political considerations. There was not much chance for a man to be elected to a place under a scheme which placed the detailed business of all civic business exclusively in the hands of a board of commissioners, and left the commissioners little to do but enact by-laws and determine policies.

Hence the commission system was in effect scrapped, the charter disregarded, and aldermen took again to themselves the business of the city. The commissioners are still there, but have been down-graded in the days when Edmonton was a town. Now it is suggested that they should be paid salaries for discharging the functions of the commissioners.

If the tax-payers prefer to have their business handled by aldermen, instead of

by commissioners, all well and good. But nothing seems logical. If aldermen are to be paid to manage the city's business, we may as well abolish the board of commissioners entirely, and go back frankly to the old town council plan, with all its political advantages.

If the idea is not to make the position of alderman a "job," but only to relieve the burden of unreasonable demands upon his time, the answer is in the air. All that aldermen have to do in that case is to bring the board of commissioners up to the numerical strength the charter provided that it should have, turn over to it the business the charter intended to give it, and let the council resume its original status as the legislative branch of the city administration.

Autumn Leaves

By EDGAR A. GUEST

Autumn tinted gold and red
Are the north wind came,
And now they are fluttering overhead
Like the leaves of autumn.

The highest of these soon will be
As it doth sleep aye,
The furthest the eye has danced to see
The leaves of autumn.

The leaves of silver and burning gold
Like dreams great and mighty tries to hold
The earth before me.

How like the leaves of the maple tree
Do our fortunes fall,
Covering the long, long road, and we
Must scatter them all.

Literature

By GLENN FRANK

Here are some of the things that Edward J. O'Brien, in his "Drama of the Machines," thinks characterizes the American short story produced in this machine age. The first is that the machine is the character of the machine.

First, the short story must be accurate, photographic, careful and without mistakes.

Second, the short story must be to a precise pattern; and is this Calvino-like, the machine?

Third, the short story is a machine, a self-contained unit, its characters, the victories of its heroes, and the failures of its villains.

Fourth, the short story must always be machine-like, with nerves and unpredictable flappiness.

Fifth, the short story is impersonal, manufacturing types rather than dramatic characters.

Sixth, the short story is to be interchangeable with its fellows.

Seventh, if it is successful, must be reproduced by its author over and over again; its author must be a machine, a robot, even though he may be able to write better stories.

Finally, the short story is concerned primarily with the machine, its uses, its functions, its mechanics.

Truth is, the short story is a machine, with its characters, the victories of its heroes, and the failures of its villains.

Truth is, the short story must be found in the periodicals of vise construction; vast circulations must be had, with high sales, and high profits, not numbered by millions, and to the short story tends to cheapen and the promoters of vast circulations must be careful.

Truth is, the short story cannot stand much creative, imaginative, or artistic work, and it is a machine.

Truth is, the short story must be used to make

flappiness as machine, with nerves and unpredictable flappiness.

Truth is, the short story is impersonal, manufacturing types rather than dramatic characters.

Truth is, the short story must be to a precise pattern; and is this Calvino-like, the machine?

Truth is, the short story is a machine, a self-contained unit, its characters, the victories of its heroes, and the failures of its villains.

Truth is, the short story must be to a precise pattern; and is this Calvino-like, the machine?

Truth is, the short story is a machine, a self-contained unit, its characters, the victories of its heroes, and the failures of its villains.

Truth is, the short story must always be machine-like, with nerves and unpredictable flappiness.

Truth is, the short story is impersonal, manufacturing types rather than dramatic characters.

Truth is, the short story is to be interchangeable with its fellows.

Truth is, if it is successful, must be reproduced by its author over and over again; its author must be a machine, a robot, even though he may be able to write better stories.

Truth is, the short story is concerned primarily with the machine, its uses, its functions, its mechanics.

Truth is, the short story is a machine, with nerves and unpredictable flappiness.

Truth is, the short story must be found in the periodicals of vise construction; vast circulations must be had, with high sales, and high profits, not numbered by millions, and to the short story tends to cheapen and the promoters of vast circulations must be careful.

Truth is, the short story cannot stand much creative, imaginative, or artistic work, and it is a machine.

Truth is, the short story must be used to make

flappiness as machine, with nerves and unpredictable flappiness.

Truth is, the short story is impersonal, manufacturing types rather than dramatic characters.

MISSTEP TO RUN IN MEET IN MARYLAND

Western Handicap Hero Is to Compete in Big Stake Race

BAITONPORT, Md., Nov. 4.—Misstep, an upright and stolid Thoroughbred, Western racing, is back in Maryland and is the most popular horse in the state, last half century of which he won under 110 pounds, turning out more than 100 wins, 100 seconds and 43 track marks, and earning \$45,000, all before he was 10 years old.

The Southern Maryland was known as the "handicap hero" in 1928 and November, as he had been for several seasons.

The green was more than \$50,000, because there was \$30,000 in added money, and the total purse was \$70,000, it cost each of sixteen starters \$1,000 to run.

Record Field Entered

There may be 100 entries. If so, the purse will be all the bigger. Acting General Manager John F. McLean, who is in charge of the organization and starters because of the present depression, said that the horses practically all the good horses of the country are strong candidates.

The 100 Nov. 1 meeting, at which the finish of the season of big racing was to be determined, was postponed before Thanksgiving Day, when the horses were to be turned out in the paddock.

Misstep is the most popular horse in the state, and he will be missed if he won't be there. He will be missed if he won't have any competition.

Victor, one of the fastest and most popular horses in the state for many years, which ran him to a nose victory in the 1928 and November, was due to Harry Payne, Whiting's Preakness winner on Thanksgiving Day, and he was to be the only good horses around Chicago this year, because he was the only horse more than 114 pounds.

Other Sun Run May Have

Other possible contestants are Sunbeam, Distraction, Budget, Peerless, Whiting, Bally, Golden Prince, Dancer, and the 100th horse, a 100-year-old, Brown Hill, Glen Wild, On Her Toes, Dumb Old Upset, Root of Sharon, Green Eyes, and the 100th horse, Curious and Crossbones.

Pacific Coast Players Receive Reporting Order

REGINA, Nov. 4.—The Pacific Coast Hockey Association has issued a new order for the 1929-30 season, which will be in effect for two weeks. Players from eastern Canada will be allowed to play for two seasons, but the association has decided that the first year will be the only one for the Maroons this season.

It is the opinion of the association that the best way to help the

WHEAT DROPS IN SYMPATHY WITH STOCKS

Reaction on Winnipeg Ex-
changes Causes Prices
Lower

Canadian Press

WINNIPEG, Nov. 4.—In a market where little buying power was evident, wheat prices dropped in sympathy with the trend of stocks at New York and in Canadian markets. Depressed at the opening, the market closed lower, with Liverpool and the selling of shares on Wall Street having a marked influence. Four cents. At the close they had risen to 146, or 2½ cents lower for the day. Traders with small shipments of wheat and flour had to export sales over the week-end were other factors in the decline. The market was off 10 cents of moderate proportion, but only the market's general expectation could be traced. Liverpool futures closed 2½ to 3½ lower.

Traders were generally unchanged. Oats were in demand in the caning market, but were lower in sympathy with wheat.

Introducing the New Silhouette in a Collection of Afternoon and Evening Frocks For Daytime, Dinner and Evening

Choose Your Afternoon and Evening Gowns from this Lovely and Inclusive Collection

MORE important this season than ever are new clothes—because fashions have undergone such a revolutionary change. The new mode demands a pictureque elegance—that is portrayed with unerring good taste in this outstanding collection.

These evening gowns and formal afternoon frocks show how imperative it is to wear the new silhouette—the molded hipline, the higher waistline, sweeping hemlines. Fashioned of metallic cloths, coarse nets, moires, velvets, satins, chiffons and georgettes, they are copies of Parisian and leading American models. Many are direct imports from France. Prices range from

We are pleased to sponsor these new style frocks in a display in our Ready-to-Wear Department, Second Floor, that specializes in fashion and concentrates on value.

They are copies of outstanding French imports. Silhouettes include the natural or semi-fitted waistline, the princess line, swathed hips, long and very full circular or godet skirts. The evening mode is classic in spirit and fluid in line, while low placed circular fullness are tucks lend interest to afternoon frocks. And to be truly smart and correct, every gown must conform to the new lengths which are featured in this collection.

Misses: 14, 16, 18, 20. Lengths: 38, 39, 40, 41.

Women's sizes: 38, 40, 42, 44. Lengths: 42, 43, 44.

The Smartest of Frocks

Fortunately at Only \$15.95

LAST season's clothes look so utterly out-of-date that every woman's immediate aim in life is to possess a whole wardrobe of these flattering new 1929 fashions! And it's so easily accomplished when frocks such as these are selling for only \$15.95.

They're fashioned of heavy crepe or softest velvet—in tailored and dressy styles—to fit the occasion whatever it may be. The newest fall and winter shades. Sizes for women and misses, at the very popular price.

\$15.95

Twenty-Five Dollar Dresses

New Dips and Flares and the Nipped-in-Waist

YOU can't compromise with the new mode. Fashion insists, "up with the waistline; down with the hemline"—nearly to the ankle for afternoon and clear to the floor for evening.

And these smart frocks for afternoon and evening prove how very wearable the new silhouette can be, and at a price which fits into the average budget. Of crepe, chiffon, velvet or moire, they have the slender princess line, graceful draperies, molded hips, soft flares and flowing new waists. Insensely priced

\$25.00

Frocks of Charm and Grace

Lovely for Afternoon and Evening Wear

THE beauty of the new silhouette finds a perfect expression in this collection of afternoon and evening frocks—and at a mode a'pting.

Skirtfully have the changed lines and details been adapted that every gown is a creation of charm, sophistication and great individuality. Only fine quality materials have been used—crepe, satin, taffeta, velvet, silk, and the silks and crepes from the far East fashion center.

At a very moderate price.
